Information Security Statement

ITH Group is committed to protecting the confidentiality, integrity, and availability of the information entrusted to us by our customers, partners, employees, and suppliers. We maintain an Information Security Management System (ISMS) supported by policies, risk management processes, access controls, security monitoring, and incident response procedures.

We apply a risk-based approach to information security, regularly reviewing and improving our controls to protect information and meet our legal, regulatory, and contractual obligations. Our staff receive security awareness training, access to systems is managed according to business need, and suppliers are subject to appropriate security due diligence.

We are committed to safeguarding personal data and maintaining the trust of our customers through responsible and secure information management practices.
